EXTC student with a product and data mindset, using customer feedback, analytics and structured problem-solving to identify opportunities and ship solutions. Led delivery of an internal project-tracking platform during an internship and developed product case studies on yard operations, consumer trust and credit risk.

Education

MPSTME, NMIMS University **2023 – 2027**
B. Tech in Electronics and Telecommunication | CGPA: 2.73/4.0

Internships

Galaxy Home Automation LLP (20-person team) — Project Management Intern **May 2026 – Jul 2026**

- Analyzed cross-team workflows and stakeholder feedback, identified scattered project updates as the core problem, and scoped an internal project-tracking platform as a single source of truth
- Led delivery of the platform, adopted across Sales, AI and Operations, with real-time KPI dashboards, automated notifications and a quotation builder; it now supports 65+ concurrent projects, cutting manual task-tracking time by 30% and reporting delays by 45%
- Identified a manual bottleneck in the quotation process and redesigned the workflow with the AI team, cutting turnaround from 4–5 hrs to 1–2 hrs; built and maintained 20+ quotations/BOQs

Projects

YardFlow — Container Storage Booking & Yard Management | Product Case Study & Prototype

- Extended an earlier working prototype (slot booking, staff phone QR scan, ESP32 gate control; never deployed) into a multi-yard product concept for drivers, transporters, security staff and yard operators
- Designed the English/Hindi booking flow: compare yards and estimated charges, book by arrival and storage duration, and share a QR/booking-code pass with the actual driver for staff verification
- Defined operator tracking of bookings, container entry/exit and storage duration, plus configurable hourly or daily yard tariffs; prototyped the key flows in an interactive HTML demo with illustrative data

CRED Engagement & Trust — Product Case Study

- Independent case study using public data: analyzed 100+ user reviews (App Store, Trustpilot) and product teardowns to diagnose a trust deficit in CRED's gamified reward mechanic
- RICE-scored 3 proposed fixes (144 vs. 77 vs. 15) to prioritize them, and proposed an A/B test on a 10–15% user holdout to validate impact

Credit Card Loan Portfolio — Risk Analysis

- Built a risk scorecard on a synthetic 150K-loan, $1.98B portfolio (SQL, Excel): credit utilization was the top default driver (32.5% vs. 6.0%); proposed underwriting changes projected to cut losses by ~$60M

Olist E-Commerce Sales Dashboard

- Built a Power BI dashboard on 99K+ orders and 96K+ customers (9-table model), tracking $16M+ revenue

Certifications

- IBM AI Product Management — In Progress
- Product Management Basics — SimpliLearn SkillUp | Jul 2026
- GenAI Powered Data Analytics Job Simulation — Tata (via Forage) | Apr 2026
- SQL (Basic & Intermediate) — HackerRank | Jul 2026
- Scrum Fundamentals Certified (SFC) — SCRUMstudy | Mar 2026

Core Skills

Product Management: Product Discovery, User Journey Design, Problem Definition, Requirements Gathering, Feature Prioritization (RICE, MoSCoW), Interactive Prototyping, Hypothesis Development, User Feedback Analysis, Stakeholder Management, Cross-functional Collaboration, Agile/Scrum
Analytics: SQL, Excel, Power BI, Basic Python, Exploratory Data Analysis, A/B Experimentation, KPI Analysis
Tools: Jira, Notion, Git/GitHub

Achievements and Positions of Responsibility

- Selected among the Top Teams for Stage 2 of Tata Technologies InnoVent-27 (7,000+ project submissions from 20,000+ students across 500+ colleges)
- Won 1st place at NMIMS Indore's inter-campus tech fest, representing the Mumbai campus; 2nd place in its AI Whisperer competition
- Scored 91.64 percentile nationally in ISWDP Level 1 (Samsung Semiconductor x IISc x Synopsys)
- Sub-Head, R&D, TechSafar 2026 (IEEE NMIMS MPSTME); Certificate of Appreciation from the Dean
